Executive Director's Message

Kirunda Nouhman, Executive Director, Eco Warriors Initiative Uganda

Dear Partners, Friends, and Supporters,

Welcome to the Eco Warriors Initiative Uganda Organizational Profile.

At Eco Warriors, we believe that every young person has the power to create meaningful change when given the right opportunity. Since our establishment, we have worked alongside communities to address some of the most pressing challenges facing Uganda today — from period poverty and climate change to youth unemployment, food insecurity, and limited access to digital skills.

Our journey has been driven by one simple belief: lasting change begins within communities. Rather than implementing solutions for people, we work with them to develop practical, sustainable, and locally owned initiatives that improve lives while protecting the environment.

Over the years, we have reached schools, youth groups, women, farmers, and local communities through programmes that promote menstrual health, environmental conservation, leadership development, digital literacy, sustainable agriculture, and sports for development. Every reusable pad distributed, every tree planted, every young person trained, and every community partnership formed represents another step toward building healthier, more resilient communities.

As we look to the future, our commitment remains stronger than ever. We aim to expand our impact, strengthen partnerships, embrace innovation, and empower even more young people to become leaders in sustainable development.

None of this would be possible without the dedication of our volunteers, staff, trustees, community leaders, development partners, and supporters who continue to believe in our vision. Your trust and collaboration inspire us to keep working towards a Uganda where every child and young person can thrive.

Thank you for being part of this journey. Together, we can create lasting change for today's generation and those yet to come.

Kirunda Nouhman

Executive Director

Eco Warriors Initiative Uganda

Foreword

Communities across Uganda continue to face interconnected challenges that affect health, education, livelihoods, and the environment. Climate change threatens agricultural productivity, many girls still miss school because of inadequate menstrual hygiene support, youth unemployment remains high, and rural communities often lack access to digital opportunities.

These challenges cannot be solved in isolation. They require integrated, community-led solutions that empower people with knowledge, practical skills, and opportunities to improve their own lives.

Eco Warriors Initiative Uganda was founded with this understanding. We bring together young people, women, schools, farmers, local leaders, volunteers, and development partners to design and implement solutions that respond to community needs while contributing to the Sustainable Development Goals (SDGs).

Our work is built on collaboration, innovation, and inclusion. Whether supporting girls to manage menstruation with dignity, training farmers in climate-smart agriculture, equipping youth with digital skills, or using sport to inspire leadership, our focus is always on creating sustainable impact that continues long after a project ends.

This organizational profile shares our vision, our work, our achievements, and our ambitions for the future. It reflects not only what we have accomplished but also the partnerships and communities that continue to make our mission possible.

About Eco Warriors Initiative Uganda

Eco Warriors Initiative Uganda is a youth-led, community-based non-profit organization committed to empowering children, young people, women, and vulnerable communities through sustainable development initiatives.

Established in Uganda, the organization works at the intersection of environmental conservation, public health, education, youth empowerment, and economic resilience. We believe that sustainable development can only be achieved when communities have the knowledge, skills, and opportunities to become active participants in shaping their own future.

Our programmes combine innovation with community participation to deliver practical solutions that improve lives while protecting the environment. We work closely with schools, local governments, community organizations, development partners, volunteers, and the private sector to implement programmes that respond to local needs and create lasting impact.

Our work contributes directly to several Sustainable Development Goals, particularly those related to quality education, gender equality, good health and well-being, decent work, climate action, reduced inequalities, and partnerships for the goals.

Today, Eco Warriors continues to grow as a trusted community partner dedicated to creating healthier, greener, and more inclusive communities across Uganda.

Our Story

Eco Warriors Initiative Uganda was born from a simple but powerful realization: many of the challenges affecting our communities are connected, and solving one often requires addressing several others at the same time.

Our founders witnessed girls missing school because they lacked menstrual hygiene products, young people struggling to find employment despite their potential, farmers facing declining harvests due to climate change, and communities experiencing increasing environmental degradation. Rather than treating these issues separately, Eco Warriors adopted a holistic approach that combines health, education, environmental conservation, economic empowerment, and youth leadership.

What began as a small youth-led initiative has grown into a dynamic organization working with schools, communities, volunteers, government institutions, and development partners to deliver sustainable solutions.

Over the years, we have launched initiatives such as Kick Out Period Poverty, My Period, My Tree, Waste to Wealth, the Eco Digital Project, Farmer Action Forum, and Play in Action, each designed to address community challenges while empowering local people to become part of the solution.

Our journey continues to be shaped by the resilience of the communities we serve and the partnerships that help us transform ideas into lasting impact.

The Challenge We Are Addressing

Communities in Uganda continue to face multiple social, economic, and environmental challenges that limit opportunities for sustainable development.

Many girls miss school due to limited access to affordable menstrual hygiene products and inadequate menstrual health education. Climate change continues to affect livelihoods through unpredictable weather, environmental degradation, and declining agricultural productivity. Young people face high levels of unemployment and limited access to practical skills that prepare them for the modern economy. Rural communities often lack digital literacy, reducing their access to information, markets, education, and employment opportunities.

At the same time, food insecurity, poor waste management, and limited opportunities for meaningful youth participation continue to slow community development.

Eco Warriors Initiative Uganda responds to these interconnected challenges by implementing integrated programmes that improve health, strengthen livelihoods, protect the environment, promote education, and empower young people to become agents of change within their communities.

Our Vision

A thriving and equitable Uganda where empowered communities lead sustainable development and environmental stewardship, ensuring a prosperous future for all.

Our Mission

To empower youth, children, women, and communities in Uganda through innovative programmes that promote sustainable economic opportunities, environmental conservation, good health, quality education, and social well-being.

Our Core Values

Community Ownership

We believe sustainable development is most effective when communities actively lead and participate in creating solutions.

Integrity and Accountability

We operate with honesty, transparency, and responsible stewardship of the resources entrusted to us.

Innovation

We embrace creativity and practical solutions that respond to evolving community challenges.

Inclusion

We promote equal opportunities for women, men, girls, boys, and persons with disabilities, ensuring that no one is left behind.

Sustainability

We design programmes that deliver long-term social, economic, and environmental benefits for future generations.

Partnership

We value collaboration with communities, governments, civil society, volunteers, donors, and the private sector to maximize impact.

Our Theory of Change

We believe that when children, young people, women, and farmers are equipped with knowledge, practical skills, resources, and opportunities, they become capable of improving their own lives and strengthening their communities.

By integrating health, climate action, education, digital innovation, sustainable agriculture, and leadership development, we enable individuals to build resilient livelihoods, improve community well-being, protect natural resources, and contribute to sustainable national development.

Through strong partnerships, community participation, continuous learning, and evidence-based programming, we create lasting impact that extends beyond individual projects and empowers communities to drive their own development.

Who We Serve

Eco Warriors Initiative Uganda works with diverse communities across Uganda, with a particular focus on vulnerable and underserved populations.

Our primary beneficiaries include:

- Children and adolescents
- Girls and young women
- Youth and youth-led groups
- Smallholder farmers
- Women's groups
- Schools and educational institutions
- Community-based organizations
- Persons with disabilities
- Local leaders and community volunteers
- Rural and peri-urban communities

We prioritize inclusive programmes that ensure everyone has the opportunity to participate, learn, and benefit regardless of age, gender, ability, or socio-economic background.

A young participant engaging in a training session

Our Areas of Work

Eco Warriors Initiative Uganda delivers integrated programmes across six strategic areas that contribute to healthier communities, stronger livelihoods, environmental sustainability, and inclusive development.

Sexual and Reproductive Health & Rights (SRHR)

Promoting menstrual health and hygiene, reducing period poverty, engaging men and boys as allies, supporting adolescent health education, and creating safe spaces where girls can learn with dignity.

Climate Action & Environmental Stewardship

Restoring ecosystems through tree planting, promoting climate-smart practices, encouraging waste reduction and recycling, and empowering communities to take action against climate change.

Food Security & Sustainable Agriculture

Supporting smallholder farmers with climate-smart agriculture, sustainable production methods, market access, and community-based farming initiatives that improve household incomes and food security.

Digital Literacy & Entrepreneurship

Equipping youth, women, and farmers with digital skills, entrepreneurship training, and access to technology that enhances education, employment, innovation, and business growth.

Sports for Development

Using sport as a platform to promote education, health, gender equality, life skills, social inclusion, and youth leadership while fostering teamwork and community engagement.

Youth Leadership & SDG Awareness

Developing the next generation of leaders through mentorship, civic engagement, volunteerism, leadership training, and advocacy for the Sustainable Development Goals.

Our Flagship Programmes

Eco Warriors Initiative Uganda implements innovative, community-driven programmes that address some of Uganda's most pressing social, environmental, and economic challenges. Each programme is designed to create lasting impact while empowering communities to lead their own development.

Kick Out Period Poverty

Restoring Dignity. Keeping Girls in School.

Kick Out Period Poverty is our flagship Sexual and Reproductive Health and Rights (SRHR) programme dedicated to ensuring that every girl can manage her menstruation safely, confidently, and with dignity. The programme tackles period poverty by increasing access to reusable sanitary pads, delivering comprehensive menstrual health education, and challenging the stigma surrounding menstruation. We actively engage boys, men, parents, teachers, and community leaders to create supportive environments where menstruation is understood as a natural part of life rather than a barrier to education. To promote long-term sustainability, the programme also equips women and youth with reusable pad-making skills, creating opportunities for income generation while improving access to affordable menstrual products within local communities.

Students receiving reusable sanitary pads during a school awareness campaign

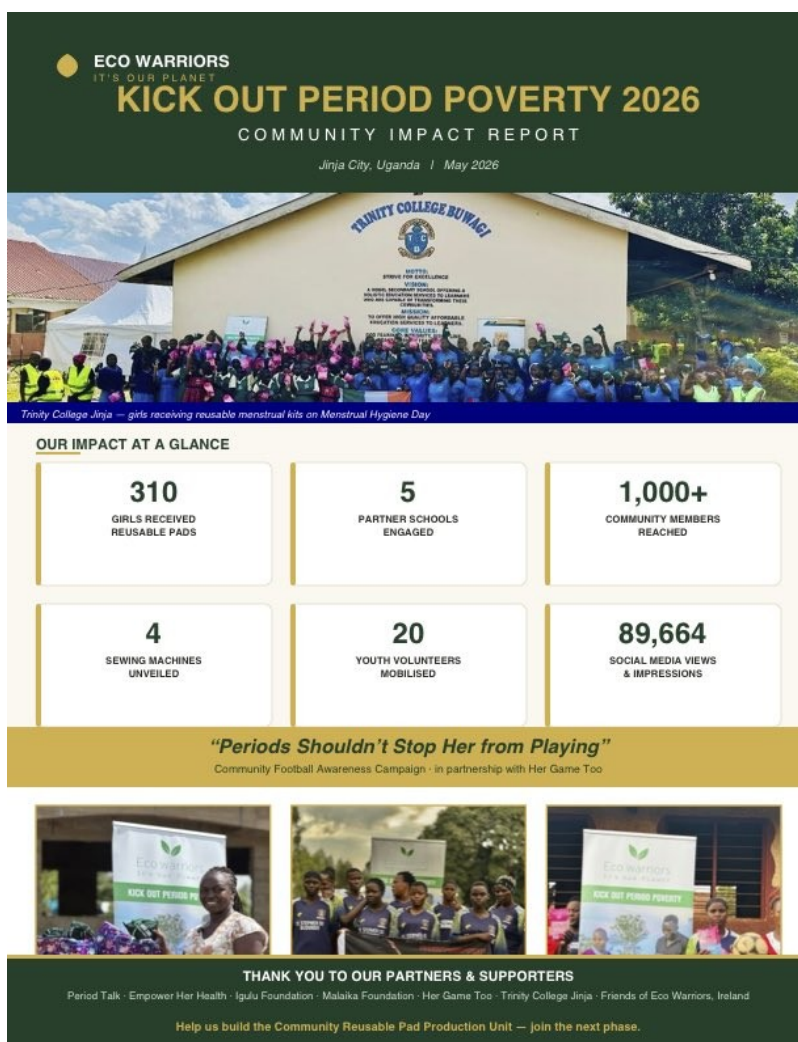

Key Focus Areas

- Menstrual health education
- Reusable sanitary pad distribution
- Reusable pad production training
- Male engagement and stigma reduction
- School and community awareness campaigns

- Women and youth economic empowerment

Expected Impact

- Reduced school absenteeism among girls
- Improved menstrual health knowledge
- Increased community support for girls
- Sustainable local production of reusable sanitary pads
- Enhanced dignity and confidence for girls and women

Kick Out Period Poverty 2026 — community impact numbers achieved

Electric sewing machines unveiled for local production of reusable pads

My Period, My Tree

Connecting Menstrual Health with Climate Action.

My Period, My Tree is an award-winning initiative that brings together environmental conservation and menstrual health in a unique and innovative way. For every menstrual health intervention, communities are encouraged to plant trees as symbols of growth, resilience, and hope. The programme inspires young people and families to become environmental stewards while promoting healthy communities. Through school tree planting, environmental education, and community-led restoration activities, the initiative demonstrates that protecting girls and protecting the planet can go hand in hand.

Key Focus Areas

- Community tree planting
- School environmental clubs
- Climate change awareness
- Environmental restoration
- Youth climate leadership
- Sustainable community action

Expected Impact

- Increased tree cover
- Improved environmental awareness

- Youth participation in climate action
- Healthier and greener communities
- Stronger community ownership of environmental conservation

Farmer Action Forum

Building Resilient Farmers. Strengthening Food Security.

The Farmer Action Forum (FAF) is a community-based initiative that supports smallholder farmers to improve productivity, increase incomes, and build resilience against climate change. The programme brings farmers together into local action groups where they receive practical training in climate-smart agriculture, sustainable farming practices, financial literacy, market access, and value addition. By strengthening collaboration among farmers and connecting them with partners and markets, the programme promotes sustainable livelihoods while improving household food security.

Farmer group meeting under the Farmer Action Forum

Key Focus Areas

- Climate-smart agriculture
- Farmer group formation
- Sustainable farming practices
- Financial literacy
- Market linkages

- Value addition
- Food security

Expected Impact

- Improved agricultural productivity
- Increased household incomes
- Better market access
- Stronger farmer organizations
- Improved food security
- Climate-resilient farming communities

Eco Digital Project

Bridging the Digital Divide. Unlocking Opportunities.

The Eco Digital Project empowers young people, women, and farmers with practical digital skills needed to thrive in today's digital economy. Participants receive training in basic computer literacy, internet use, digital communication, online safety, entrepreneurship, productivity tools, and digital marketing. The programme also introduces participants to technology that supports education, employment, agriculture, and business development. Our vision is to ensure that no community is left behind in the digital transformation.

Graduates of an Eco Digital Project training programme

Key Focus Areas

- Digital literacy
- Computer skills

- Internet access and safety
- Digital entrepreneurship
- Online business development
- Employment readiness
- Digital inclusion

Expected Impact

- Improved digital skills
- Increased employment opportunities
- Growth of youth-led businesses
- Enhanced access to information and services
- Stronger digital inclusion in rural communities

Waste to Wealth Initiative

Turning Waste into Opportunity.

The Waste to Wealth Initiative transforms environmental challenges into economic opportunities by promoting recycling, upcycling, and circular economy solutions. The programme equips young people with practical skills to convert plastic and other recyclable materials into useful and marketable products. Beyond reducing pollution, it encourages innovation, entrepreneurship, and responsible environmental stewardship. Through schools and community outreach, participants learn that waste is not simply something to discard — it can become a valuable resource.

Students turning plastic bottles into upcycled materials

Key Focus Areas

- Plastic recycling
- Upcycling innovation
- Green entrepreneurship
- Circular economy education
- Environmental conservation
- Community clean-up campaigns

Expected Impact

- Reduced environmental pollution
- Increased recycling practices
- Youth employment opportunities
- Green business creation
- Cleaner schools and communities

Play in Action

Using Sport to Inspire Positive Change.

Play in Action is Eco Warriors Initiative Uganda's Sports for Development programme that harnesses the power of sport to improve health, education, leadership, and social inclusion. The programme creates safe spaces where children and young people develop life skills, teamwork, leadership, discipline, and confidence through structured sports activities. Sport is also used as a platform to raise awareness about health, climate action, gender equality, education, and child protection. By combining play with learning, the programme empowers young people to become active citizens and future community leaders.

Young people at a Play in Action community sports session

Key Focus Areas

- Sports for development
- Life skills education
- Youth leadership
- Gender equality through sport
- Health promotion
- Child protection
- Community engagement

Expected Impact

- Improved physical and mental well-being
- Increased school participation
- Stronger leadership among young people
- Greater social inclusion
- Reduced risky behaviours
- More resilient and engaged communities

Together, these flagship programmes reflect Eco Warriors Initiative Uganda's commitment to creating integrated, community-led solutions that improve lives, protect the environment, and empower people to build a more sustainable and equitable future.

Our Approach

At Eco Warriors Initiative Uganda, we believe that sustainable development is achieved when communities are actively involved in identifying challenges and designing solutions. Our approach places people at the centre of development by building local capacity, promoting ownership, and creating partnerships that generate long-term impact.

Our programmes are designed to address interconnected challenges through integrated interventions that improve health, strengthen livelihoods, protect the environment, and empower communities.

Community-Led Development

We work closely with community members to understand their priorities and ensure that every programme responds to locally identified needs.

Youth-Led Innovation

As a youth-led organization, we empower young people to become leaders, innovators, and changemakers within their communities.

Partnerships for Impact

We collaborate with government institutions, schools, civil society organizations, development partners, volunteers, and the private sector to maximize our collective impact.

Evidence-Based Programming

Our interventions are informed by community consultations, baseline assessments, monitoring data, and continuous learning.

Sustainability

We focus on solutions that communities can continue implementing long after individual projects have ended.

Our Impact

Since our establishment, Eco Warriors Initiative Uganda has positively impacted thousands of lives through programmes that improve health, education, environmental conservation, livelihoods, and youth leadership.

Our achievements include:

- Supported girls through menstrual health education and reusable sanitary pad distribution.
- Mobilized communities to plant trees and participate in environmental restoration.
- Trained youth and women in digital literacy and entrepreneurship.
- Equipped farmers with climate-smart agriculture knowledge and sustainable farming practices.
- Promoted recycling and circular economy solutions through the Waste to Wealth Initiative.
- Empowered young people through leadership development, volunteerism, and sports for development.
- Built partnerships with local, national, and international organizations to expand community impact.

Beyond the numbers, our greatest achievement is the confidence, resilience, and hope that communities gain through our programmes.

Stories of Change

A Girl Who Stayed in School

For many girls, menstruation once meant missing classes and falling behind in their education. Through the Kick Out Period Poverty programme, girls received reusable sanitary pads, menstrual health education, and encouragement from teachers and community leaders. Today, many of these girls attend school with greater confidence and are able to focus on achieving their educational goals without fear or shame.

Students advocating for good health and period-friendly school facilities

A Farmer Building Climate Resilience

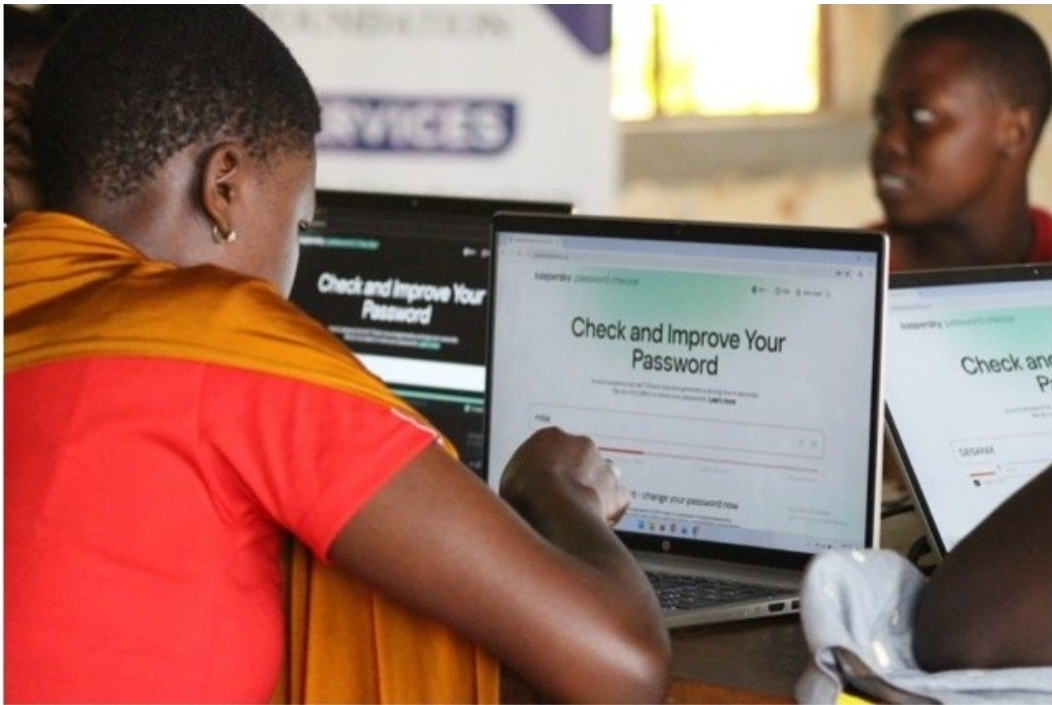

After participating in training under the Farmer Action Forum, local farmers began adopting climate-smart agricultural practices that improved soil health and crop productivity. By working together as farmer groups, they strengthened their bargaining power, improved market access, and increased household food security.

A farmer tending to crops in the field

A Young Person Embracing the Digital World

Through the Eco Digital Project, young people who had never used a computer gained practical digital skills that opened new opportunities for education, employment, and entrepreneurship. Many participants now use technology to access information, communicate professionally, and develop innovative business ideas.

A young participant learning practical digital skills

Partnerships

Collaboration is at the heart of our work. We believe sustainable development is achieved when organizations, institutions, communities, and individuals work together toward shared goals.

We partner with:

- Government institutions
- Schools and educational institutions
- Community-based organizations
- Civil society organizations
- Development partners
- International volunteers
- Corporate partners
- Youth networks
- Local leaders
- Media organizations

Our partnerships strengthen programme quality, expand our reach, and enable us to deliver greater impact across communities.

A community engagement event with partners under the Kick Out Period Poverty programme

Governance and Leadership

Eco Warriors Initiative Uganda is guided by principles of transparency, accountability, integrity, and responsible leadership.

The organization is overseen by a Board of Directors, which provides strategic guidance, governance oversight, and policy direction.

Day-to-day operations are led by the Executive Director, supported by a dedicated team of staff, programme coordinators, volunteers, and technical advisors who work together to implement the organization's mission.

We are committed to maintaining strong governance systems that promote accountability to our beneficiaries, partners, donors, and the communities we serve.

Monitoring, Evaluation and Learning

Measuring our impact is essential to improving our programmes and ensuring accountability.

Our Monitoring, Evaluation, and Learning (MEL) framework enables us to:

- Track programme performance.
- Measure outcomes and long-term impact.
- Collect beneficiary feedback.
- Monitor progress against strategic objectives.
- Generate evidence for learning and decision-making.
- Improve programme quality through continuous adaptation.

We use both quantitative and qualitative data to understand what works, identify lessons learned, and strengthen future interventions.

Sustainability Strategy

Eco Warriors Initiative Uganda is committed to building programmes that continue creating impact beyond project funding.

Our sustainability strategy focuses on:

- Building community ownership.
- Strengthening local leadership.
- Supporting social enterprises such as reusable sanitary pad production and recycling initiatives.
- Diversifying funding sources.
- Investing in volunteer development.
- Building long-term strategic partnerships.
- Strengthening institutional capacity.
- Promoting environmentally sustainable practices across all programmes.

By embedding sustainability into every intervention, we ensure communities remain resilient and capable of driving their own development.

Strategic Priorities (2026-2030)

Over the next five years, Eco Warriors Initiative Uganda aims to:

- Expand access to menstrual health services and reproductive health education.
- Strengthen climate resilience through community-led environmental conservation.
- Scale up climate-smart agriculture and food security programmes.
- Increase digital literacy and entrepreneurship opportunities for youth and women.
- Use sports as a platform for education, health promotion, and social inclusion.
- Strengthen youth leadership and civic participation.
- Expand partnerships with governments, donors, private sector organizations, and international agencies.
- Improve organizational systems, governance, and institutional sustainability.
- Increase evidence-based advocacy and policy engagement.

Where We Work

Eco Warriors Initiative Uganda currently works in communities across Eastern Uganda, with a strong presence in Jinja City and surrounding areas.

Our programmes are implemented in collaboration with schools, health facilities, community groups, youth organizations, farmer associations, and local governments.

As the organization continues to grow, we aim to expand our reach to additional districts across Uganda through strategic partnerships and community-led programming.

Funding Priorities

To expand our impact and reach more vulnerable communities, Eco Warriors Initiative Uganda is seeking support in the following areas:

- Menstrual health and hygiene programmes.
- Climate action and environmental restoration.
- Community tree planting initiatives.
- Climate-smart agriculture and food security.
- Digital literacy and innovation centres.
- Youth leadership and volunteer development.
- Sports for Development programmes.
- Women and youth entrepreneurship.
- Organizational capacity strengthening.
- Research, monitoring, and learning.

Every investment contributes directly to healthier communities, stronger livelihoods, and sustainable development.

Why Partner With Eco Warriors?

Partnering with Eco Warriors Initiative Uganda means investing in community-led solutions that create measurable and lasting impact.

Our strengths include:

- Youth-led leadership and innovation.
- Strong grassroots community engagement.
- Integrated programming across health, climate, education, and livelihoods.
- Transparent governance and financial accountability.
- Experienced volunteers and committed staff.
- Strong relationships with schools, communities, and local leaders.
- A growing track record of successful partnerships.
- Commitment to the Sustainable Development Goals (SDGs).

Together, we can empower communities, improve lives, and build a more resilient Uganda.

Acknowledgements

The achievements of Eco Warriors Initiative Uganda are made possible through the collective efforts of our communities, volunteers, staff, Board of Directors, development partners, donors, schools, local governments, and supporters.

We extend our sincere appreciation to everyone who has contributed their time, expertise, resources, and encouragement to our mission. Your partnership continues to inspire meaningful change and strengthens our commitment to creating healthier, greener, and more inclusive communities.

Together, we are building a future where every child, young person, woman, and community has the opportunity to thrive.
