STRATEGIC PLAN 2026: ECOWARRIORS INITIATIVE UGANDA

Theme: *"From Awareness to Action: Empowering the Future Leaders of Uganda"*

1. Organizational Identity

Ecowarriors Initiative Uganda is a non-profit organization dedicated to fostering community-led transformation by intersecting health, climate action, and economic empowerment.

Vision

A thriving and equitable Uganda where empowered communities lead sustainable development and environmental stewardship, ensuring a prosperous future for all.

Mission

To empower youth, children, women, and communities in Uganda through innovative programs that promote sustainable economic opportunities, environmental conservation, and social well-being.

Core Values

- **Resilience:** We build the capacity of communities to adapt to climate and social challenges with strength and innovation.
- **Ownership:** We believe in community-led solutions where local people take the lead in their own development.
- **Opportunity:** We create pathways for the marginalized—especially women and youth—to access education, technology, and fair markets.
- **Transparency:** We uphold the highest standards of accountability to our beneficiaries, partners, and volunteers.
- **Stewardship:** We act as responsible guardians of the environment, ensuring that today's progress does not compromise tomorrow's resources.

2. Pillar: Food Security & Sustainable Procurement

Strategic Objective: To improve access to nutritious food and promote sustainable production through ethical market integration.

Strategies:

- Farmer Action Groups: Establish village-level groups of 30 farmers for collective training and resource sharing.
- Smart Farming Clinics: Deploy National and International Agriculture Volunteers to lead workshops in regenerative techniques and organic composting.
- Sustainable Procurement: Facilitate "Farm-to-Institution" agreements where local schools/hospitals commit to sourcing at least 30% of their food from our farmers.
- Value Chain Training: Equip farmers with post-harvest handling skills to meet the quality standards of formal institutional buyers.

3. Pillar: Sexual & Reproductive Health and Rights (SRHR)

Strategic Goal: To ensure community health and agency through comprehensive reproductive rights and menstrual dignity.

Strategies:

- Kickout Period Poverty (KPP) 2.0: Establish school vocational hubs for reusable pad production, supported by Social Work Volunteers.
 - Comprehensive Outreach: Implement "Youth-Friendly Corners" and peer educator networks for health information on consent, STIs, and pregnancy prevention.
 - Male Engagement: Involve men and boys in SRHR dialogues to dismantle cultural taboos.
-

4. Pillar: Leadership & SDG Awareness

Strategic Objective: To mentor a generation of leaders who view local development through the lens of the Global Goals (SDGs).

Strategies:

- SDG Mentorship: Pair student leaders with National University Volunteers to integrate the SDGs into school development plans.
- Disability Inclusiveness: Ensure all leadership platforms are accessible and representative of PWDs.

- Ecowarriors Volunteer Corps: Organize monthly "Community Action Days" led by youth and university interns.

5. Pillar: Climate Action & Environmental Stewardship

Strategic Objective: To lead community-based initiatives that mitigate climate impacts and promote a healthy ecosystem.

Strategies:

- My Period, My Tree 2.0: Scale school reforestation to include Fruit-Forests, linking environmental restoration to student nutrition.
- Waste to Wealth Innovation: Collaborate with Environmental Science Volunteers to scale plastic upcycling into green businesses.
- Youth-Led Nurseries: Establish decentralized nurseries managed by youth to supply local reforestation projects.

6. Pillar: Digital Literacy & Entrepreneurship Skills

Strategic Objective: To bridge the digital divide for the entire community and foster economic independence.

Strategies:

- Inclusive Digital Clinics: Deploy ICT Volunteers from universities to provide digital training for community members on internet safety and e-governance.
- Digital Ag-Business: Train farmers to use digital tools for weather tracking, mobile money, and e-commerce.
- STEM for Social Good: Facilitate workshops where youth and university students co-design low-tech solutions (e.g., solar driers).
- Business Incubation: Provide vocational training and microfinance access to foster sustainable livelihoods.

7. Monitoring, Evaluation, and Governance

- **Impact Tracking:** Utilize monthly data collection to measure school attendance, farmer income, and volunteer contributions.
- **Volunteer Integration:** Maintain a formal database of national and international university volunteers to ensure skill-matching across all pillars.
- **Financial Accountability:** Conduct semi-annual audits to ensure all resources are used transparently according to our core values.
